## Yamaha stagepas 600i price philippines

Find a Yupangco Music Store near you! All the World's YOUR Stage The new STAGEPAS features two sleek, lightweight speakers and a detachable powered mixer, along with one pair of speaker cables and a power cord, giving you a complete, extremely portable sound solution that can be set up quickly and easily in a variety of configurations and environments. By combining new high-efficiency amplifiers, newly designed speakers, and high performance DSP, the new STAGEPAS delivers a significant increase in power output (400W for the 400i and 680W for the 600i) as well as substantial improvements in sound quality and reliability. Complementing the boost in performance, the addition of iPod/iPhone connectivity, SPX digital reverbs, an onboard feedback suppressor and more versatile EQ, has improved functionality and ease of use considerably, allowing STAGEPAS to meet the demands of a much wider range of applications and users. The Ultimate All-in-One Portable PA System The new STAGEPAS 400i and 600i are complete, all-in-one sound solutions that are extremely portable and easy to set up, allowing users to instantly add high quality sound reinforcement to virtually any environment. New Mixer Features for a Streamlined Set-up The new STAGEPAS was designed to offer high quality sound, simply and quickly to let you do what you do best. Whether you're giving a speech or playing a gig, STAGEPAS is equipped with intelligent new features that provide simple, intuitive control of optimized settings, making it easy to dial in your perfect sound in a matter of seconds. A Flexible Mixer with Improved Functionality Equipped with 10 channels or 8 channels respectively, the STAGEPAS 600i and 400i offer versatile connectivity, comprehensive channel functions, and seamless expandability that meet the growing demands of a wider range of applications and environments. Higher Power Output, Higher Sound Quality, Higher Reliability By combining new high-efficiency amplifiers, newly designed speakers and high performance DSP, the new STAGEPAS delivers a significant increase in power output, with substantial improvements in sound quality and reliability. Ultimate portability Compact and light enough to carry by hand, STAGEPAS is an all-in-one PA system that you can take literally anywhere. The two lightweight speakers and a detachable mixer, along with one pair of speaker cables and a power cord, combine into an attractive, compact package that provides the kind of portability that no roadie would ever dare to dream of. Fast and easy set-up With its intuitive, simple design, STAGEPAS can be set up and ready to go in a matter of seconds. Even users with no PA operation experience will be able to produce high-quality sound in under a minute. A PA for any occasion Flexible enough to be used in a truly impressive range of environments and applications, STAGEPAS systems can be set up in a variety of PA and monitoring configurations. The new STAGEPAS was designed to offer high quality sound, simply and quickly to let you do what you do best. Whether you're giving a speech or playing a gig, STAGEPAS is equipped with intelligent new features that provide simple, intuitive control of optimized settings, making it easy to dial in your perfect sound in a matter of seconds. iPod/iPhone digital connection Enjoy high-quality playback while also charging your iPod/iPhone so you never have to worry about a drained battery messing with your performance. SPX digital reverb One knob gives you access to four different high-quality reverb settings, perfect for vocals and acoustic instruments. Simply turn the knob to change the reverb type and time, and then you're ready to apply just the right amount of high-resolution effect to each channel. 1-Knob Master EQ™ This new function gives you instant mastery of your mix, allowing you to match your sound to your surroundings. Simply turn the knob to optimize the EQ for speaking engagements, musical performances, or just to kick in more bass; getting your sound right has never been so easy. Feedback suppressor Avoid the uncomfortable feedback that plagues so many sound reinforcement novices and professionals alike. Usually found only on high-end gear, this intelligent function removes feedback automatically with the push of a button, giving you a clear, professional sound. Equipped with 10 channels or 8 channels respectively, the STAGEPAS 600i and 400i offer versatile connectivity, comprehensive channel functions, and seamless expandability that meet the growing demands of a wider range of applications and environments. New STAGEPAS Mixer - Channel EQ Assign detailed EQ settings to each channel for precise management of your final sound. Great sounding 2-band EQ on the STAGEPAS 400i and more flexible 3-band EQ on the 600i make setup easy and precise. Vocal and guitar performances especially will benefit from newly added mid-range control on 600i. - Hi-Z switch Connect acoustic-electric guitars and basses to enjoy high-quality performance with low distortion. Passive pickup instruments can be connected hassle-free, without a direct box. - Switchable stereo/mono inputs A versatile new feature that allows you to transform each stereo channel input into two independent mono inputs, giving you the flexibility to adapt to the needs of a broad range of performance requirements. - Phantom power Connect condenser microphones directly to STAGEPAS to get the best sound quality possible. Phantom power also means you won't have to worry about DI boxes losing their charge during a performance. - Reverb footswitch For hands-free control of your reverb, connecting an optional footswitch allows you to turn the reverb on and off instantly—perfect for MC-ing events or speaking during solo performances. - Monitor out Expand your front-of-house system or set up a monitoring system by using the STAGEPAS together with other powered speakers such as Yamaha's DXR lineup. - Subwoofer out Add more bottom end to your system by connecting a powered subwoofer such as the Yamaha DXS Series. Simply plugging in a subwoofer will assign a high-pass filter to the STAGEPAS speakers automatically. By combining new high-efficiency amplifiers, newly designed speakers and high performance DSP, the new STAGEPAS delivers a significant increase in power output, with substantial improvements in sound quality and reliability More power. More possibilities. Delivering 680 and 400 watts of power respectively, the STAGEPAS 600i and 400i offer a major boost in performance, allowing you to meet the demands of a wider range of situations. New speaker design for an increased coverage area The new speaker design lets you deliver evenly-distributed, high-quality sound to a greater coverage area, so that the entire audience shares the same sonic experience. Intelligent DSP for peak performance that lasts STAGEPAS utilizes digital signal processing (DSP) to offer the consistently high-quality, distortion-free sound at any volume level, whether you're giving a business presentation or cutting loose in a club. What's more, Yamaha's intelligent DSP incorporates the use of advanced limiter circuits to protect vital STAGEPAS components, ensuring that you get the most out of your gear for years to come. System Type Powered mixer with 2 passive speakers Maximum SPL (Maximum SPL) 129dB SPL / speaker Frequency Range (-10 dB) 55Hz - 20kHz Power Consumption 35W (idle), 100W (1/8 Power) Power Requirements 100V - 240V 50Hz/60Hz Dimensions (W x H x D) Speaker 335x545x319mm, Mixer 348x197x135mm Net Weight 2.5 kg / 5.6lbs (2 x Speaker 1.0 kg) + Mixer 3.8 kg) Mixing channels 10 Analog inputs 4 mono mic/line + 6 mono / 3 stereo line Digital inputs USB Audio IN: iPod/iPhone exclusive \* Channel EQ 3-band (HIGH Shelving: 8kHz, MID peaking: 2.5kHz, LOW Shelving: 100Hz) Channel functions Hi-Z switch: CH4, ST/MONO switch: CH5/6-9/10 Digital effects SPX digital reverb (4 program, parameter control) Output processing Feedback suppressor: 1-Knob Master EQ™ Phantom power +30V (CH1, 2) Outputs SPEAKERS OUT (L, R), MONITOR OUT (L/MONO, R), SUBWOOFER OUT (MONO) with auto HPF Control and others Reverb foot switch, Built-in Amplifiers Power Rating (Dynamic) 680W (340W + 340W) Power Rating (Continuous) 560W (280W + 280W) Type Two-way bass-reflex speakers Transducers LF: 10" (25cm) cone, HF: 1.4" (3.56cm) voice coil compression driver Coverage Angle (Horizontal x Vertical) 90° x 60° Floor Monitor Angle 50° Handle 1 x Top Pole socket 34.8-35.2mm pole socket with StageLok™ Portable PA System: The Yamaha STAGEPAS 600i is a 680-watt, portable PA system which consists of a 8-channel powered mixer, two 8" passive speakers, a pair of speaker cables, and a power cord. In addition, the STAGEPAS 600i offers iPod/iPhone USB connection, SPX digital reverbs, an onboard feedback suppressor, and versatile EQ. Compact and light enough to carry by hand, the STAGEPAS 600i all-in-one PA system can go almost anywhere. The two lightweight speakers and external power mixer combine into an simple, compact package that provides portability and great sound. With its intuitive, simple design, STAGEPAS 600i can be set up and ready to go in a matter of minutes. Even users with no PA operation experience will be able to produce high-quality sound in no time. Flexible enough to be used in a truly impressive range of environments and applications, the STAGEPAS 600i system can be set up in a variety of PA and monitoring configurations; great for acoustic guitar and vocal, band performance, public speaking, or mobile DJ-ing. Pair of Passive Speakers: The Yamaha STAGEPAS 600i includes a pair of two-way passive speakers that are capable of producing a wide soundstage. Two-Way Speaker Design: Each passive speaker employs a two-way design with a horn-loaded 1.4" tweeter and 10" woofer. The pure titanium 1.4" compression driver is mounted to a 90°x 60° non-resonant, constant directivity horn with the goal of minimizing radiation pattern deterioration in oblique directions as more conventional horns are prone to doing. This can help to achieve a more ideal coverage area without irregularities. With the new wide dispersion constant directivity horn, sound expands in a more rectangular pattern providing 90° horizontal x 60° vertical coverage, with wide-frequency sound projected to the edges of the coverage area. The high power 8" woofer provides deep bass response with low distortion for great sound. ABS Bass Reflex Enclosure: The speakers feature a rugged, non-resonant ABS enclosure that is designed to dampen down vibrations caused by high output levels, producing less distortion, and superior sonic quality. The road-tested enclosure is equipped with heavy-duty grilles and ergonomic, gripped handles that greatly improve durability and portability. The speaker uses a Bass Reflex enclosure for greater efficiency and bigger bass. 1/4" Phone Jacks: Each speaker features a 1/4" phone jack. Use the included speaker cables to connect the speakers to the corresponding 1/4" phone jacks on the power mixer. Mounting Options: The speakers feature a 1.375" (35mm) pole socket for use with Yamaha's speaker stand (SS238C, sold separately) for easy positioning in a wide range of applications. Built-in Amp w/ Intelligent DSP: The Yamaha STAGEPAS 600i's external power mixer is equipped with a 560W RMS/680W Peak amplifier that is optimally designed to match the system's passive two-way speakers. The STAGEPAS 600i also utilizes digital signal processing (DSP) to offer the consistently high-quality, distortion-free sound at any volume level, whether you're giving a business presentation or cutting loose in a club. What's more, Yamaha's intelligent DSP incorporates the use of advanced limiter circuits to protect vital STAGEPAS 600i components, ensuring that you get the most out of your gear for years to come. Versatile Mixer Inputs: The Yamaha STAGEPAS 600i is equipped with four Mic/Line input jacks (1-4) and six Line input jacks (5/6-7/8-9/10) which can be configured to fit a variety applications. The Line input jacks (5/6-7/8-9/10) can be set to stereo or mono. Input Channels 1-2: selectable Mic/Line XLR-3-31 inputs Input Channels 3-4: selectable Mic/Line XLR/Phone-combo inputs Input Channels 5/6: selectable mono/stereo 1/4" phone Input Channels 7/8: selectable mono/stereo 1/4" phone or RCA Line inputs Input Channels 9/10: selectable mono/stereo 1/4" phone or minijack Line inputs (or USB input for iPod/iPhone). Hi-Z Switch & Phantom Power: The Hi-Z switch allows a passive pickup instrument to be connected hassle-free, without a direct box to input channel 4. You'll be able to connect and acoustic-electric guitar to enjoy high-quality performance with low distortion. Phantom power for input channels 1-2 (+30V) allows you to connect condenser microphones directly to STAGEPAS 600i to get the best sound quality possible. It also means you won't have to worry about DI boxes losing their charge during a performance. Monitor & Subwoofer Out: Expand your front-of-house system or set up a monitoring system by using the STAGEPAS 600i together with other powered speakers such as Yamaha's DXR lineup (sold separately). Add more bottom end to your system by connecting a powered subwoofer such as the Yamaha DXS Series (sold separately). Simply plugging in a subwoofer will assign a high-pass filter to the STAGEPAS 600i speakers automatically. EQ & Level Control: The Yamaha STAGEPAS 600i is equipped with a 1-knob Master EQ & level dial, as well as a 2-Band EQ and level dial for each channel. 1-Knob Master EQ & Level Adjustment: The 1-Knob Master EQ (Speech-Music-Bass Boss) & Level Control (0-10) gives you instant control of your mix, allowing you to match your sound to your surroundings. Simply turn the knob to optimize the EQ for speaking engagements, musical performances, or just to kick in more bass; getting your sound right has never been so easy. Channel EQ & Level Adjustment: You'll also be able to assign detailed EQ and level settings to each channel for precise management of your final sound. The 3-band Channel EQ (8kHz/2.5kHz/100Hz) & Level Control (0-10) on the STAGEPAS 600i makes setup easy and precise. Note: A level meter, consisting of five LEDs, shows the level of output signal from the STAGEPAS 600i's speaker outputs (L/R). SPX Digital Reverb (optional Reverb Footswitch): One knob gives you access to four different high-quality reverb settings (Hall, Plate, Room, Echo); perfect for vocals and acoustic instruments. Simply turn the knob to change the reverb type and time, and then you're ready to apply just the right amount of high-resolution effect to each channel. For hands-free control of your reverb, connecting an optional footswitch (sold separately) allows you to turn the reverb on and off instantly; perfect for MC-ing events or speaking during solo performances. Feedback Suppressor: Avoid the uncomfortable feedback that plagues so many sound reinforcement novices and professionals alike. Usually found only on high-end gear, this intelligent function removes feedback automatically with the push of a button, giving you a clear, professional sound. iPod/iPhone Connectivity: Connect your iPod/iPhone using a USB cable to play music and charge the iPod/iPhone. Use the "LEVEL" control of channels 7/8 to adjust the volume, since the music signals are mixed to those channels. This connector supplies 5V power to the connected USB device. This connector does not support digital audio playback from USB devices other than the iPod/iPhone. For playback of such devices, use appropriate stereo minijack or RCA connectors.
